

Cognizant Automates Enterprise Application Testing

Cognizant helps a leading US based media conglomerate speed up testing of its SAP ERP application

The Business Challenge

The client, a leading US based media conglomerate, wanted to develop reusable scripts for frequent upgrades in the SAP application.

Cognizant was brought in to ensure end to end Quality Assurance.

The challenges were:

- Unavailability of the End to End Business Process Model,
- Managing impact of the changes
- Low level of Automation

These led to higher costs and higher QA effort.

Our Solution

Cognizant leveraged CBPA, its business process testing & automation framework to optimize testing.

Cognizant Business Process Assurance platform for Enterprise Applications (CBPA) helps to

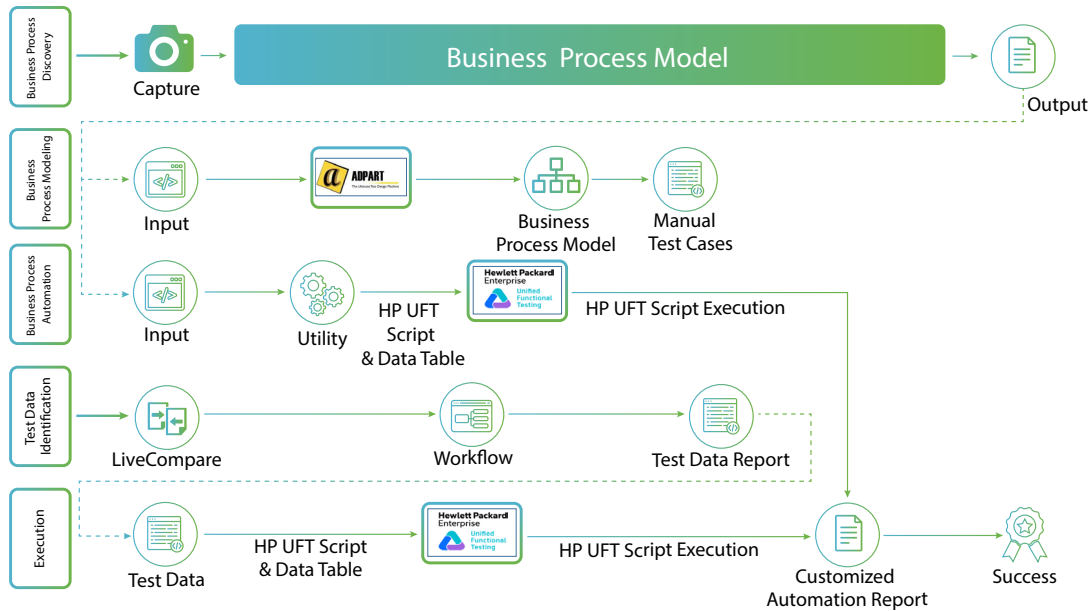

capture business process scenarios, which enable the client to:

- Design Level 4 business process model
- Create Ready-to-use manual test case
- Generate Automation test scripts and
- Benchmark business process

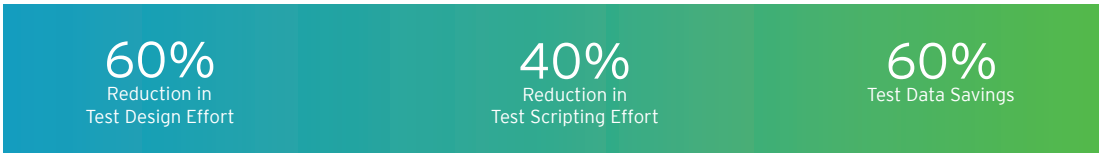

The CBPA Platform Advantage

- **Reduced Test Design Effort**
CBPA generated UFT based automation scripts which reduces the effort for automation test design
- **Lower cost**
Reduced testing efforts resulted in lower costs
- **Real time Analysis**
CBPA platform analyzed real time test data which reduced test execution failures
- **Cross Platform integration**
CBPA seamlessly integrates with other Cognizant IPs and other external proprietary tools

CBPA Platform for Enterprise Applications in Action
